Medical Spa Report

INTENSIVE RESURFACING PEEL

Available in single-use ampoules for application three times a week for four weeks, Intensive Resurfacing Peel from **Murad** exfoliates and resurfaces the skin without irritation or downtime. The serum features Durian Cell Reform, an anti-aging complex that combines glycolic acid with the benefits of the fruit durian, which contains lipids and sugars that encourage cell proliferation. Durian also increases the ability of other essential ingredients in the product to penetrate the skin, such as hyaluronic acid, dried plum extract, and vitamin C. (800) 33-MURAD; <http://www.murad.com/>.

TNS NIGHT EYE REPAIR

SkinMedica's **TNS Night Eye Repair** contains antioxidants, hyaluronic acid, peptides, and vitamins A, C, and E to help improve the appearance of the delicate area around the eyes. This night cream, which is appropriate for all skin types, is said to increase firmness and elasticity, reduce the appearance of dark circles, and strengthen and hydrate the skin. (877) 944-1412; <http://www.skinmedica.com/>.

EXTREME LIFT FACE

Extreme Lift Face from **Kinerase** boosts the synthesis of collagen, acts as a protective shield against oxidative stress, and strengthens the connective tissue, leaving skin smoother and younger looking. The serum absorbs quickly into the skin without leaving a tacky feeling and instantly evens out skintone, promoting a radiant complexion. (800) 321-4576; <http://www.kinerase.com/>.

TOKI POWDER

LaneLabs introduces TOKI Powder, which, when combined with water, creates a natural drink that helps reduce the appearance of fine lines and age spots and improves the skin's texture through oral ingestion of absorbable collagen. The drink contains three essential nutrients to help improve the appearance of the skin: calcium, collagen, and hyaluronic acid. (800) 526-3005; <http://www.lanelabs.com/>.
